

The TCVESSA Educational Committee presents . . .

Evaluating A Litter for Conformation Prospects at 8 Weeks

Breeders and Springer enthusiasts are invited to a special educational session sponsored by TCVESSA. **Francie Nelson**, TCVESSA president and AKC Judge of four sporting breeds, will begin the program with a brief introduction to the Springer breed standard, focusing on breed type and how we use the standard most effectively in puppy evaluation and pedigree study. Then, a panel of leading ESS breeders led by **Julie Roberts** will discuss the merits of each puppy in the 8-week-old Louis x Phoebe litter. With their vast years of experience and familiarity with most dogs in their pedigree, the panel will share their insights and predictions on how these puppies will mature into adulthood. There will be an opportunity for questions, too.

The Parents: **Phoebe** (Ch. Eldamar's Dartek Rising Star) x **Louis** (Ch. Rendition Autumfire Armstrong)
